Figure 8.4.3: Recall Comparison

Comparative performance analysis for Recall between Existing Systems (Average) and Proposed DeepWAF-XAI.

ttack Category / Evaluation Sco	xisting Systems (Average) (%	oposed DeepWAF-XAI (%
Normal Traffic (LEGAL)	92.50	**92.40**
SQL Injection (SQL)	90.24	**77.58**
Cross-Site Scripting (XSS)	74.74	**95.94**
Path Traversal (SHELL)	83.05	**81.25**
Phishing URLs (PHISHING)	99.40	**100.00**
Overall Average	**91.23**	**92.59**

Academic & Methodological Note:

Existing-system values represent benchmarks reported in the referenced literature (ModSecurity CRS, ML baseline, BALNet, UniEmbed, and HawkPhish-DNN), whereas DeepWAF-XAI values represent measurements obtained from the project's evaluation dataset. Differences in datasets, experimental settings, and evaluation methodologies may affect direct comparability. (DeepWAF-XAI Overall
